Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed issues relating to the Withdrawal of Allowance and the use of Furukawa. Regarding the Withdrawal of Allowance, Applicant believes that the statement by the Examiner "Newly discovered references make the claims unpatentable" was a mistake. Applicant believes, because of this statement, the withdrawal from allowance was in error and should be withdrawn. Examiner acknowledges that the art used in the rejection was in fact already of record and the statement of newly discovered references was in error. Examiner indicated that a correction to the statement would be made in the next office action. The status of the withdrawal is that prior art not previously applied in a rejection was in fact properly used in a rejection on 07/31/03 and claims remain rejected.

Applicant also discussed issues relating to Furukawa. Applicant clarified the contents of claim 1 and detailed various aspects of Furukawa. Applicant believes that Furukawa does not teach that pressure sensitive buttons are not taught on the right hand side of the controller. Applicant also directed Examiner's attention to various points in Furukawa in attempts to show that feature to be missing in the reference. Examiner explained to Applicant that a definitive answer could not be given at the moment, and that further review of the standing art is needed. Examiner asked Applicant to provide written correspondence detailing Applicant's position so that a proper answer can be supplied. .
